

# Notes fast.ai course

Michael Sendker

Starting July 3, 2021

I don't know the google course is a little boring and the interactive bits are kinda weird and wonky. I'm gonna try fastai.

I should be signing and reading my new legal docs but screw it ML is more interesting.

This book is interesting enough, I like that it's all in a notebook, but they distinctly recommend against using local machines and yet I'm having a lot of trouble with paperspace gradient. I am considering paying the 8 a month but I'm just not sure it's worth it?
